## SOCIAL

## And Dolls' Reception Last Night in the Gold Building.

The ladies of the Ohio Street Methodist church gave an unique entertainment last night in Gold's block which proved to be an immense success. The special features were:

A collection of dolls, numbering 136, and arranged so that their beauty, oddity, or grotesqueness showed to the very best advantage. The dolls belonged to the children of the city, and in many instances were attired in exquisite laces, satins and embroideries. Some of the dolls were as large as life, others not over an inch in length.

There were also "coon" dolls as natural as the genuine article. There was also a masculine doll made to represent President Cleveland, and a doll in full bridal robes, who in the natural idea of being opportune, represented his bride as a matter of course. In one instance a doll belonging to Mabel Ironton was attired in a dress worn by the little girl's papa in 1848. Another doll sat in a chair eighty years old, and was itself thirty-six years old, wore a dress fifty-six years old and a belt one hundred years old. The entire doll reception was worth attending. In addition a "Mikado" department was added, and many beautiful Japanese articles were displayed. This was under the immediate care of Miss Mattie Kennedy in full Japanese costume. Tables, on which were served cakes, cream, ices, etc., was presided over by Mesdames McLaughlin, Hulland, J. W. Mills, A. A. Slack, Dr. Jones, Misses Phemie Higleyman, Annetta Jones and a number of others. The success of the affair warranted the ladies in continuing it over to-day and accordingly an entertainment of ices and strawberries will begin for the children to-day at 2 o'clock. This evening, also, the doors will be open and Miss Helen Gallie will serve tea from the beautiful little Japanese tea-pot in her popular costume of Katisha.

James T. Montgomery vs. James E. Scott; cause heard before the court; judgment for plaintiff for \$247.30 with ten per cent. interest.

I found it a sure cure. I have been troubled with catarrhal deafness for seven or eight years with a roaring noise in my head. I bought medicine in 13 states but nothing helped me till I procured a bottle of Ely's Cream Balm. In four days I could hear as well as ever. I am cured of the Catarrh as well. I consider Ely's Cream Balm the best medicine ever made.—GARRETT WIDKICK, Hastings, N. York.

## SERIOUS SLIDES.

## Narrow Escape of a Missouri Pacific Train from Going Into a Ditch.

The Bridge at Paris, on the M., K. & T., in a Very Shaky Condition.

The heavy rains of Tuesday night, both north and east of here, resulted rather disastrously to the main line of the Missouri Pacific road, while the M., K. & T. did not escape slight damage. The result was, nearly all the trains were late yesterday, to the great inconvenience of the traveling public.

Missouri Pacific train No. 3, due here at 3:30 a. m., did not reach here until after 3 p. m., and it is a miracle that it arrived even then. Tuesday evening the first and second sections of No. 3 pulled out of St. Louis, during a drenching rain. The first section, in charge of conductor Al. Marsh, ran to a point three miles east of Washington, and about 10 o'clock p. m. a huge landslide was encountered, which resulted in the train laying up for the remainder of the night.

The second section, in charge of Conductor Frank Sargent, struck a small landslide not far from Gray's Summit, but passed over safely, and then ran to a point a few miles east of Washington, when a second slide was encountered, necessitating a stop until morning. Investigation disclosed that a short distance ahead of where the train stopped there was a washout of nearly 200 feet, the track, roadbed and all being gone, and had the train struck this the result is fearful to contemplate, as a large loss of life would have been inevitable. As it was, no one was injured and the train was in nowise damaged. A large force of men were promptly put to work, and after the noon hour the breaks were repaired, and traffic, both freight and passenger, was resumed.

The trains that went east yesterday morning, Nos. 6 and 2, ran to the point where the washouts had occurred, and transfers were made, Conductors Marsh and Knowlton returning to St. Louis, while Conductors Sargent and Whitaker came through to this city with their trains.

On the M., K. & T., the train from the north, due at 5:30 a. m., failed to arrive until 11:30 o'clock. It was then learned that train No. 154, which left here at 11 p. m. Tuesday, ran to Paris, where the bridge which spans Salt river was found to be unsafe and a transfer was necessary. The bridge is being repaired, it appears, and a false structure had been constructed. A large amount of driftwood had resulted in the trestle being partially carried away, thus making the bridge proper unsafe. It is thought the repairs will be far enough advanced to permit trains to cross by this evening, and until then transfers will be in order.

A large amount of driftwood had resulted in the trestle being partially carried away, thus making the bridge proper unsafe. It is thought the repairs will be far enough advanced to permit trains to cross by this evening, and until then transfers will be in order.

On the M., K. & T., the train from the north, due at 5:30 a. m., failed to arrive until 11:30 o'clock. It was then learned that train No. 154, which left here at 11 p. m. Tuesday, ran to Paris, where the bridge which spans Salt river was found to be unsafe and a transfer was necessary. The bridge is being repaired, it appears, and a false structure had been constructed.
